In the beginning...

World Wide Web

The WorldWideWeb (W3) is a wide-area hypermedia information retrieval initiative aiming to give universal access to a large universe of documents.

Everything there is online about W3 is linked directly or indirectly to this document, including an executive summary of the project, Mailing lists , Policy , November's W3 news , Frequently Asked Questions .

What's out there?
Pointers to the world's online information, subjects , W3 servers, etc.
Help
on the browser you are using
Software Products
A list of W3 project components and their current state. (e.g. Line Mode ,X11 Viola , NeXTStep , Servers , Tools , Mail robot , Library)
Technical
Details of protocols, formats, program internals etc
Bibliography
Paper documentation on W3 and references.
People
A list of some people involved in the project.
History
A summary of the history of the project.
How can I help ?
If you would like to support the web..
Getting code
Getting the code by anonymous FTP , etc.

ABOUT DEGREES STUDENT WORK HOW TO APPLY CONTACT

Multimedia Arts

ASSOCIATE OF APPLIED SCIENCE DEGREE IN MULTIMEDIA ARTS

Enter the dynamic world of media arts as you study photography, filmmaking, and motion graphics in the Visual Communications program

DEGREE OVERVIEW

The AAS degree in Multimedia Arts is a unique path of study that is mostly separate from the other degree tracks within the Visual Communications program. Students earning this degree will take courses in photography, motion graphics/animation, and filmmaking.

Starting the degree track with a cohort of other students in the fall, all Multimedia Arts students take the initial software class (joined by other VC students) before diverging into degree-specific classes. Students within the other degree tracks, and experience a range of cutting-edge media equipment, facilities, and techniques.

All of this coursework culminates in a demo reel or staged exhibit that ranges in form and media depending on the student's area of

How to Make Pulled Pork
Making barbecue-restaurant-worthy pulled pork is easier to make than you think. You'll find a detailed ingredient list and step-by-step instructions in the recipe below, but let's go over the basics:
Pulled Pork Ingredients
Oil: This pulled pork recipe starts with a teaspoon of vegetable oil at the bottom of your slow cooker.
Pork: If your pork shoulder roast is larger or smaller than four pounds, you'll need to adjust the ingredient rations and cook time.
Sauces: You'll need bottled barbecue sauce, yellow mustard, and Worcestershire sauce.
Apple cider vinegar: Apple cider vinegar adds brightness and cuts through the other rich flavors.
Broth: Use store-bought or homemade chicken broth.
Brown sugar: Light brown sugar lends warmth and sweetness.
Seasonings: This flavorful pork is seasoned with chili powder, garlic, and dried thyme.
Onion: A chopped onion gives the pork tons of flavor.
Buns and butter: You'll need buttered hamburger buns if you plan to make pulled pork sandwiches.

This pulled pork recipe is tender, juicy, and oh-so flavorful — and it's incredibly easy to make in your slow cooker!

How to Make Pulled Pork

Making barbecue-restaurant-worthy pulled pork is easier to make than you think. You'll find a detailed ingredient list and step-by-step instructions in the recipe below, but let's go over the basics:

Pulled Pork Ingredients

- **Oil**: This pulled pork recipe starts with a teaspoon of vegetable oil at the bottom of your slow cooker.
- **Pork**: If your pork shoulder roast is larger or smaller than four pounds, you'll need to adjust the ingredient rations and cook time.
- **Sauces**: You'll need bottled barbecue sauce, yellow mustard, and Worcestershire sauce.
- **Apple cider vinegar**: Apple cider vinegar adds brightness and cuts through the other rich flavors.
- **Broth**: Use store-bought or homemade chicken broth.
- **Brown sugar**: Light brown sugar lends warmth and sweetness.
- **Seasonings**: This flavorful pork is seasoned with chili powder, garlic, and dried thyme.
- **Onion**: A chopped onion gives the pork tons of flavor.
- **Buns** and **butter**: You'll need buttered hamburger buns if you plan to make pulled pork sandwiches.

Which Cut of Meat for Pulled Pork?

This recipe calls for a pork shoulder roast for a few reasons: It's inexpensive, forgiving to work with, and tends to have a lot of marbling (which means it'll result in tender pulled pork).

How to Make Pulled Pork In the Slow Cooker

Here's a brief overview of what you can expect when you make homemade pulled pork in the Crock-Pot:

1. Pour oil into the slow cooker, then place the roast on top of the oil.
2. Add the remaining ingredients to the Crock-Pot.
3. Cover and cook until the pork shreds easily.
4. Shred the pork and return it to the slow cooker to combine it with the juices.
5. If you're making sandwiches, serve the pulled pork on buttered buns.

How Much Pulled Pork Per Person?

You'll need about ⅓- to ½-pound pork per person. This recipe, which starts with a 4-pound pork roast, serves about eight people.

What to Serve With Pulled Pork

Wondering what to serve with your pulled pork? Explore this collection of Our Best Barbecue Side Dishes. Here are a few of the recipes you'll find:

- Baked Beans from Scratch
- Simple Macaroni and Cheese
- Traditional Creamy Coleslaw

What to Do With Leftover Pulled Pork

Never let your leftovers go to waste! Check out our collection of Leftover Pulled Pork Recipes for delicious inspiration. Here are some of the mouthwatering recipes you can expect:

- Creamy Pulled Pork Soup
- Quick and Easy Pulled Pork Burritos
- Pulled Pork Nachos with Sriracha Slaw

HTTP, URL, & HTML Explained

(Yes, the really mean something, and you bet they're important)

Beginnings

- **Sir Tim Berners-Lee**
  - Created the first workable hyperlink system for the Internet.
  - First system was designed so that Physicists could share research papers.

http://www.flickr.com/photos/dunechaser/sets/72057594116462049/

Berners-Lee set the groundwork for three universal technologies:

HTTP—The universal communications language (how transmitted)

URL—The directions to information (where)

HTML—The mark-up language (how structured)

Information Management: A Proposal

Abstract

This proposal concerns the management of general information about accelerators and experiments at CERN. It discusses the problems of loss of information about complex evolving systems and derives a solution based on a distributed hypertext sytstem.

Keywords: Hypertext, Computer conferencing, Document retrieval, Information management, Project control

Document Title: NCSA Mosaic Home Page!

Document URL: http://www.ncsa.uiuc.edu/SDG/Software/Mosaic/NCSAMosaicHome.html

Welcome to NCSA Mosaic, an Internet information browser and World Wide Web client. NCSA Mosaic was developed at the National Center for Supercomputing Applications at the University of Illinois in --> Urbana-Champaign. NCSA Mosaic software is copyrighted by The Board of Trustees of the University of Illinois (UI), and ownership remains with the UI.

Jan '97

The Software Development Group at NCSA has worked on NCSA Mosaic for nearly four years and we've learned a lot in the process. We are honored that we were able to help bring this technology to the masses and appreciated all the support and feedback we have received in return. However, the time has come for us to concentrate our limited resources in other areas of interest and development on Mosaic is complete.

All information about the Mosaic project is available from the homepages.

NCSA Mosaic Platforms:

- NCSA Mosaic for the X Window System
- NCSA Mosaic for the Apple Macintosh
- NCSA Mosaic for Microsoft Windows

World Wide Web Resources The following resources are available to help introduce you to cyberspace and keep track of its growth:

- A glossary of World Wide Web terms and acronyms
- An INDEX to Mosaic related documents
- NCSA Mosaic Access Page for persons with disabilities
- Mosaic and WWW related Tutorials
- Internet Resources Meta-Index at NCSA

HTML Identification Lab

`<!DOCTYPE html>`	A method of instructing a Web browser which layout mode to use when displaying a page (options include Quirks mode and Standards mode, which is the default).
`<html></html>`	The html tags tells the web browser what type of document it is.
`<head></head>`	Most of the content within the head tags are invisible to the user. They give directions to the browser.
`<body></body>`	The web page content goes between the body tags
`<title></title>`	The title tag is always nested between the beginning and ending head tag. It tells the browser what text to display in the Title Bar of the browser window, and is used when bookmarked.

Basic HTML Page

```
<html>
    <head>
        <title>Page Title</title>
    </head>
    <body>
        <p>Hello World</p>
    </body>
</html>
```

not visible

visible

`<p></p>`	**Paragraph tag** Most commonly used tag for displaying text

`<h1></h1>`
`<h2></h2>`
`<h3></h3>`
`<h4></h4>`
`<h5></h5>`
`<h6></h6>`
	Header tags
	Used to display content headers and establish a content hierarchy. H1 is the most important header, H2 second-most, and so on…

`<img />`	**Image tag** Used to insert images into your page. Note that this tag does not have a closing tag—you should add a / just before closing the tag.
`<a></a>`	**Anchor tag** Used to make text or images links to other pages, images or documents.

`<em></em>`	**Emphasis** Use to emphasize a line of text. By default it will italicize text.
`<strong></strong>`	**Strong** Use to bold text.
`<div></div>`	**Division tag** Used to group content together

        	Unordered List The tag is used to describe a list of items in which the order is not important. The tag contains the actual list items. Is used for lists of bulleted items and for navigation links.
        	Ordered List Same as , but will number/letter order the items if you request it. Use where order is important.
	Span tag A meaningless inline tag. Use to mark-up content for styling or scripting of inline content. Does not create a new paragraph when closed.
<!-- Hello World -->	**Comments** Text placed between these tags will not appear on a Web page. Used to insert comments and notes to yourself regarding a page.
